

BInfTech plan Health Informatics (2007 offering)

Year	Semester 1	Semester 2
1	<i>CSSE1001 Introduction to Software Engineering</i>	MMDS1400 Introduction to Web Design
1	<i>MATH1061 Discrete Mathematics</i>	<i>CSSE2002 Programming in the Large</i>
1	<i>INFS1200 Introduction to Information Systems</i>	ECON2460 Health Economics
1	COMP2506 Human-Computer Interaction	CSSE1000 Introduction to Computer Systems
2	PUBH1102 Introduction to Population Health	PUBH2007 Health Research Methods
2	COMP2303 Network & Operating Systems Principles	COMP3506 Algorithms & Data Structures
2	elective	INFS2200 Relational Database Systems
2	INFS3xxx	CSSE2003 Software Engineering Studio
3	<i>CSSE3004 Advanced Information Technology Project</i>	
3	INFS3xxx	INFS3xxx
3	HLTH3000 Legal & Ethical Principles in Health	elective
3	PUBH3002 Evaluation of Health Services: Field Placement	elective

Courses in *italics* are offered both semesters (CSSE3005 would be the S2 start for CSSE3004). Courses in **red** are compulsory, in **blue**, plan electives (of which #8 must be level 3), and **green** off-plan courses added to the major.

Note that a double major cannot be taken with a dual degree and the green courses *do not* count towards the #32 requirement of courses off the BInfTech plan.

In this plan, COMP2303 may be replaced by another plan elective.

The last semester requires study in Ipswich. More electives are available if it is possible to commute to Ipswich in other semesters, e.g., the first semester of second year may be reorganized to fit in Ipswich courses.

See the official BInfTech list for all the allowed variations.
